Profile

I am currently in my final year of a Computer Science degree and working with data mining, statistics, database systems, data analysis, machine learning, deep learning, and software development.

I consistently optimize my time and consider myself an organized person committed to completing assigned tasks, I also like to teach myself different skills, such as playing the piano.

Academic Projects

As part of my academic projects, I have developed a desktop application, a web application, and a mobile application. I have knowledge of programming languages such as Python, Java, and JavaScript, as well as front-end technologies (HTML, CSS, JavaScript) and databases such as MySQL and Oracle.

Additional Experience

Full-time missionary for The Church of Jesus Christ of Latter-day Saints (2024–2026), where I developed communication, teamwork, and leadership skills, adapting to new environments and challenges.
